

## *TOP N DELIVERIES BY STATE AND CITY*

The screenshot displays the IBM Cognos Analytics web interface. On the left, the 'Selected sources' pane shows a list of fields from the 'DHL\_Facilities.csv' dataset, including STATE, CITY, OBJECTID, and various address and location fields. The main workspace, labeled 'Tab 1', contains a table titled 'OBJECTID, CITY and STATE'. The table has three columns: STATE, CITY, and OBJECTID. The data is filtered for the state of Texas (TX) and shows the top 2 deliveries by OBJECTID. The 'Columns' pane on the right is open, showing the configuration for the 'Top or bottom' query. It is set to show the 'Top count' of 2 results, ordered by 'OBJECTID'. The 'Add a rank column to table' checkbox is checked. The bottom of the screen shows a Windows taskbar with various application icons and a system tray indicating the time as 23:12 on 21-09-2022.

STATE	CITY	OBJECTID
TX	HOUSTON	453
TX	DALLAS	242
TX	AUSTIN	188
TX	SAN ANTONIO	149
TX	IRVING	72
TX	PLANO	63
TX	PORT WORTH	62
TX	ARLINGTON	39
TX	CORPUS CHRISTI	39
TX	EL PASO	32
